

I CLAIM:

1. A golf practising device comprising:

a base including a first end for supporting a ball to be swung or put by users, and including a second end,

05 a plurality of sensors disposed along said base for sensing a movement of the ball along said base,

a displayer device, and

a processor device coupled to said sensors for receiving signals from said sensors and for treating
10 the signals from said sensors and for sending treated signals to said displayer device and to be displayed on said displayer device.

2. The golf practising device according to claim 1, wherein said base includes at least one side having a fence disposed thereon, said sensors are disposed on
04 said fence and facing toward said base.

3. The golf practising device according to claim 2, wherein said fence includes a plurality of bars
03 secured together.

4. The golf practising device according to claim 3, wherein a first of said bars includes a cavity formed therein, and a second of said bars includes a tongue extended therefrom and engaged into said cavity
05 of said first bar for securing said first bar and said second bar together.

5. The golf practising device according to claim

4, wherein said first bar includes a first terminal disposed in said cavity thereof, and said second bar includes a second terminal disposed on said tongue for
05 engaging with said first terminal when said tongue is engaged into said cavity of said first bar.

6. The golf practising device according to claim 1 further comprising a housing disposed on said second
03 end of said base for supporting said sensors.

7. The golf practising device according to claim 6, wherein said housing includes an upper panel for supporting said sensors, said sensors are facing
04 downward toward said base.

8. The golf practising device according to claim 7, wherein said housing includes an indicator disposed
03 on said upper panel for aiming purposes.

9. The golf practising device according to claim 6, wherein said housing includes at least one side panel having a cavity formed therein, said base includes at least one side having a fence disposed
05 thereon, said fence includes a tongue extended therefrom and engaged into said cavity of said at least one side panel for securing said fence to said at least one side panel of said housing.

10. The golf practising device according to claim 9, wherein said at least one side panel includes a first terminal disposed in said cavity thereof, and said fence includes a second terminal disposed on said

05 tongue for engaging with said first terminal when said
tongue is engaged into said cavity of said at least one
side panel.

11. The golf practising device according to claim
9, wherein said processor device is secured onto said
03 at least one side panel of said housing.
